

Candidate Q&A

Associate Flutter Developer Assessment

Candidate Name: Lakshan Ramawickrama

Email: rgrlakshan@gmail.com | **Phone:** +94 71 534 1931

Location: Ratmalana, Sri Lanka

Position Applied For: Associate Flutter Developer

Question 1: How soon can you join our team if selected?

Answer:

As I am currently employed, I can join the team within **1 week or 1 month** (or earlier subject to mutual agreement and completion of notice period formalities at my current employer).

Question 2: Are you currently employed? If yes, what is your notice period?

Answer:

Yes, I am currently employed as a **Software Engineer at Whiterock Global Solutions (Pvt) Ltd** (since March 2026). My standard notice period is **1 month** (or 1 to 4 weeks depending on early transition arrangements).

Question 3: What are your salary expectations (monthly)?

Answer:

My monthly salary expectation is **LKR 120,000 - 150,000**. I am open to discussing a mutually beneficial compensation package based on company standards and the overall value and growth opportunities offered.

Question 4: Please provide a brief summary about yourself, including your educational background, technical skills, Flutter/mobile development experience, and any relevant projects.

Answer:

Professional Summary

I am an Associate Software Engineer with practical experience in full-stack web and mobile application development using Flutter, Firebase, React, TypeScript, Next.js, Django, PostgreSQL, and MongoDB. I have a strong background in developing scalable applications, RESTful API integration, state management, containerization with Docker, and clean architecture principles.

Educational Background

- **Higher National Diploma in Information Technology (HNDIT)** (2023 – Present) — Sri Lanka Institute of Advanced Technological Education (SLIATE - Galle)
- **GCE (A/L) Examination – Physical Science Stream** (2020) — Matara Central College

Technical Skills

- **Mobile Development:** Flutter, Dart, Firebase, React Native
- **Programming Languages:** Dart, TypeScript, JavaScript, Python, Java, C#, SQL
- **Frontend & Web:** React, Next.js, Tailwind CSS, HTML5, CSS3
- **Backend & APIs:** RESTful API Design, Django, Laravel, Firebase, JWT Auth
- **Databases:** PostgreSQL, MongoDB, MySQL, SQLite, Supabase, SQL Server
- **Tools & DevOps:** Git, GitHub, Docker, VS Code, Figma, Unity
- **Concepts & Architecture:** Clean Architecture, State Management (Provider, etc.), SOLID Principles, RBAC, Unit & Widget Testing

Work Experience & Flutter/Mobile Experience

1. **Software Engineer | Whiterock Global Solutions (Pvt) Ltd** (March 2026 – Present)
 - Developed and maintained mobile applications using **Flutter** and **Firebase**.
 - Built and maintained enterprise ERP and CRM systems using React, Next.js, TypeScript, and Django REST APIs.
 - Worked with MongoDB and containerized services using Docker.
2. **Full Stack Software Engineer Intern | NAITA Head Office** (September 2025 – March 2026)
 - Developed RESTful APIs with Django/Python, implemented JWT authentication and role-based access control (RBAC).
 - Designed PostgreSQL/SQLite database schemas and integrated backends with React frontend component libraries.

Relevant Projects

3. **Product Catalogue Application (Assessment Submission):**
 - Built a responsive cross-platform Flutter application featuring real-time substring search, horizontal category filter chips, persistent favourites (shared_preferences), light/dark Material 3 theme toggle, API fetching from FakeStore API with offline fallback, hero transitions, and comprehensive unit/widget tests.
4. **Mobile Apps at Whiterock Global Solutions:**
 - Built and maintained cross-platform mobile solutions integrating **Flutter** with **Firebase** backends for user authentication, real-time data sync, and cloud services.
5. **Enterprise ERP & CRM Platforms (Whiterock Global Solutions):**
 - Contributed to full-stack ERP & CRM platforms handling inventory, sales pipeline tracking, and reporting with Django REST Framework, Next.js, and MongoDB.
6. **IETI Website & Service Desk Ticket System (NAITA):**
 - Full-stack web and ticket management systems using React, TypeScript, and Django.

Question 5: Why are you interested in pursuing a career in mobile application development, specifically with Flutter?

Answer:

Mobile application development allows engineers to put powerful, intuitive tools directly into users' hands. Having worked on both full-stack web and mobile systems, I have found that mobile apps offer the most direct and rewarding user experience impact.

Why Flutter Specifically?

7. **Unified Cross-Platform Performance:** Flutter enables writing a single Dart codebase that compiles to native ARM code for iOS and Android, delivering exceptional 60+ FPS performance without sacrificing platform-specific responsiveness.
 8. **First-Class Developer Experience:** Features like Hot Reload drastically shorten the development cycle, allowing rapid iteration, real-time UI tweaks, and fast bug fixing.
 9. **Rich UI Capabilities & Declarative Layouts:** Flutter's extensive widget tree, combined with Material 3 and custom animation support (such as Hero transitions), makes building visually striking and fluid interfaces simple and reliable.
 10. **Proven Experience & Career Focus:** Having already built Flutter mobile applications integrated with Firebase and RESTful APIs, I want to specialize and deepen my expertise as a dedicated Flutter Developer.
- Joining your team as an Associate Flutter Developer allows me to leverage my full-stack background, Flutter proficiency, and problem-solving skills to build scalable, production-grade mobile applications.
